

A&W

Exam Preparation Session

Nil Ozer

Outline

- Lernphase
- Exam Preparation for A&W
 - Website Explanation
- Mock Exam
- Semester-End celebration (pizza & drinks)

Lernphase

ETH Exams

- You already know, use it !
- Exhausting ! Could be fun :)
- What is “enough” ?
 - How does scale work ?
- Everybody is in the same position as you

Lernphase

Planning

- “Waste” 1-2 days on planning !
 - You are making promises to yourself !
- Relatively , **easy** !
- It’s a long run .
- Interleave the subjects
- My planning looked like ...
 - Lernplan template for you !
 - Add/remove

[illegible]

Be aware of your time left at all stages!

Lernphase

Tipps for Analysis I

- Take over and edit an existing cheat sheet
 - Constant work !
 - Don't waste too much time in the beginning
 - You can also write yours
- Semester exercises !!
 - The book
- Go week by week
- Solve exams !! (focus on imamoglu)

For each week do :

Analysis I	
To-Do	h
W1 :	
Skript recapping	
CS prep (or reading)	
Semester exercises	

Lernphase

Tipps for DDCA

- Take over and edit an existing cheat sheet (or write one)
- Learn topic by topic
 - Also solve starting from your best in the exam !!
- Then resolve the exams
 - Have complete exam trials

For each topic do :

DDCA	
To-Do	h
Topic 1 :	
Optional HWs previous years	
Optional HW this year	
YT Videos from previous years	
Solve 1-4 exams	

Lernphase

Tipps for PProg

- Written semester exercises !
- Divide to 2 parts
- Old exams !!

For each part do :

PProg	
To-Do	h
Part 1 :	
Recap	
Semester exercises	
3-4 exams	

A&W Exam

I've got you !

Sei $\Omega = \{-3, -2, 0, 2, 3\}$ ein Laplacersraum und sei ω ein (zufälliges) Elementarereignis in Ω . Berechnen Sie $E[|\omega|]$.

Answer:

Max wirft 10 faire Münzen. Leider hat er vergessen vorher das Fenster zu schliessen und jede seiner Münzen wird mit Wahrscheinlichkeit p von einer Elster gestohlen (unabhängig von den anderen Münzen).

Was ist die Wahrscheinlichkeit, dass Max wenigstens eine Münze, die Zahl zeigt, behält?

☐ ✓ $1 - (1 - (1 - p)/2)^{10}$

☐ × $1 - p^{10}$

☐ × $5 \cdot (1 - p)$

☐ × $1 - (1 - p)^{10}/2^{10}$

Welche der folgenden Probleme können -- mithilfe von Ideen aus dem Kurs -- als Fluss-Probleme modelliert und gelöst werden?

Richtig Falsch

- | | | |
|----------------------------------|----------------------------------|---|
| <input checked="" type="radio"/> | <input type="radio"/> | Herausfinden, ob ein bipartiter Graph G ein perfektes Matching hat. |
| <input type="radio"/> | <input checked="" type="radio"/> | Den längsten Pfad in einem Graph G finden. |
| <input checked="" type="radio"/> | <input type="radio"/> | Herausfinden, ob ein Graph G 2-Kanten-zusammenhängend ist. |
| <input checked="" type="radio"/> | <input type="radio"/> | Herausfinden, ob ein Graph G 2-Knoten-zusammenhängend ist. |

~2 points

Seien A, B, C unabhängige Ereignisse. Welche der folgenden Gleichungen sind immer wahr?

Richtig Falsch

- | | | |
|----------------------------------|----------------------------------|---|
| <input checked="" type="radio"/> | <input type="radio"/> | $\Pr[A \cap B] = \Pr[A] \cdot \Pr[B]$ |
| <input type="radio"/> | <input checked="" type="radio"/> | $\Pr[A] + \Pr[B] \leq \Pr[A \cup B]$ |
| <input checked="" type="radio"/> | <input type="radio"/> | $\Pr[A B \cap C] = \Pr[A B \cup C]$ |
| <input type="radio"/> | <input checked="" type="radio"/> | $\Pr[(A \cup B) \cap C] = (\Pr[A] + \Pr[B]) \cdot \Pr[C]$ |

Mock Exam 2022

Written Theory

Schriftliche Aufgaben - Part 5

Zeigen/Widerlegen Sie folgende Aussagen

- a) Sei $G = (A \cup B, E)$ ein regulärer bipartiter Graph mit $E \neq \emptyset$. Dann ist $|A| = |B|$.
- b) Seien X und Y unabhängige Zufallsvariablen. Dann gilt $\mathbb{E}[\max(X, Y)] = \max(\mathbb{E}[X], \mathbb{E}[Y])$
- c) Sei v ein Knoten, der inzident zu mindestens zwei Brücken ist. Dann ist u ein Artikulationsknoten.

A&W Overview

Lernphase

Tipps for A&W

- As I promised, you're very well prepared already
- However, you need to practice !
 - Minitests
 - Theory tasks
 - CodeEx
- Kahoots

How to study for A&W in the Lernphase

Use the exam prep page !!

- Recap topics use the summary/skript , Add/remove things , prepare your own summary !
- Theory exercises solve the relevant exercises not the weird ones
- Mock exam tasks document with mock exam tasks we've solved in class , try it yourself !
- Kahoots a folder with all of the kahoots will be uploaded. I'll add remaining topics.
- You can always ask me :)
- Watch the youtube videos when I upload them
- Work on Probability tasks, Work on Flow tasks
- Do exam trials , Code regularly !

Exam Preparation Page Introduction

Let's take a break

Mock Exam

Last Weeks ...

- 08.05 : Randomized Algorithms II
- 15.05 : Flow
- 23.05 online : Minimum Cut , Smallest Enclosing Circle
- 28.05 extra session : Exam Prep Session  + Pizza and Drinks
- 30.05 last extra session : Convex Hull (shortly remaining primality tests)

Bye...

Nil Ozer
